

Office Inspirations

Product Guide 2016

A modern office interior featuring white desks, black ergonomic chairs, and teal cubicles. The ceiling has exposed ductwork and recessed lighting. Large windows are visible in the background. A dark blue diagonal overlay covers the bottom left corner, containing text.

Custom needs, project speed

Large projects with custom requirements are our specialty at AMS Furniture. Our project consultants provide full support from engineering solutions, meeting product specifications, working within budget, and delivering on material and delivery deadlines.

A Customer-Centric Culture

At AMS, customers always come first. It's been that way ever since we began manufacturing Australian office furniture more than 10 years ago.

Today, we're a second generation family business with decades of experience and an internal culture that puts customers at the very core of our business. Quality, reliability and service are what we stand for – backed by our experienced and professional team of more than 60 employees. They're here to make sure that projects are delivered on time and within budget.

Meet the Team

Our experienced Australian-based team is here to help.

Providing the best possible products and services to our distributors requires a team that's knowledgeable in many areas: product design and innovation, manufacturing and specification, as well as office interior design and workplace trends. Then there's the operational expertise to ensure that everything runs smoothly – from freight and dispatch, service, account management, finance and marketing.

Find us on 

Nathan Kennard

Managing Director

Nathan founded AMS Furniture in 2003 after spending more than 15 years directing sales and operations in a family-owned office fit-out business. With over 25 years direct experience in furniture design, manufacturing and project delivery, his knowledge and industry insight provides foundational strength to the management team at AMS. As Managing Director, he is committed to visionary leadership for the management team, developing the product range and refining the operations of the business as it continues to expand and diversify.

Joel Kennard

General Manager

With a strong background in finance, Joel joined AMS Furniture in 2012 and is today ultimately responsible for the Sales, Marketing and Finance teams. His focus is on delivering exceptional service through high-value, quality solutions that meet client expectations, while also developing long-term partnerships with dealers.

Oliver Kennard

Operations Director

As Operations Director, Oliver is the person who makes sure AMS continually improves its processes and adopts best practice methods. Innovation comes naturally due to a constant focus on R&D through market research, design consultancy and ongoing trend analysis, putting AMS at the forefront of industry advances. Oliver is also responsible for building strategic alliances with cutting-edge manufacturing and supply partners.

Design & Planning

Whether it's adapting furniture from our standard range or creating a fully customised solution, our project consultants are in-house and on-hand to bring furniture visions to life.

We are experienced working with the exacting needs of both architects and manufacturers, and because our team is based in Australia, we're always on top of the latest design trends and innovations. We can also ensure each project is highly practical, helping to specify quality standards and quantities to suit individual needs.

Local Manufacturing, Immediate Availability

As an Australian office furniture manufacturer, we're backed by more than 5,000 square metres of state-of-the-art manufacturing, our own fleet of delivery vehicles, and a large customer service team.

This gives us a unique ability to provide highly customised solutions to meet individual client requirements. We also provide a manufacturing alternative to other Australian furniture companies, with excellent value products proven to avoid over-pricing and over-engineering.

We also know that many clients require quick access to office furniture when project deadlines are tight. That's why we keep our Express range fully stocked in our Sydney & Lisarow warehouses, ready for immediate pickup or delivery.

Our Showroom: Make it Yours

Our Sydney showroom is designed
with dealers in mind.

It's the perfect place to showcase AMS products to your clients – in a professional setting that allows them to see, touch and experience the AMS difference. Based in St Leonards, the showroom is organised into product zones to make for easy comparison and choice. Even better, it's unbranded, so you can truly use it as your own and take complete charge of the sales experience, with full support from AMS staff if you need it.

Australia's Answer to Office Furniture

We help you create workplaces that work, in a uniquely Australian way.

Designing, manufacturing and installing office furniture solutions might sound simple. But a solution that looks good, feels great and functions to perfection? That takes a difference that's hard to come by. It comes down to genuine Australian DNA.

Furniture distributors and fit-out companies throughout Australia choose to work with AMS to avoid issues with imported products: delivery delays, quality problems and communication breakdowns. Instead, we make it intuitive. Exacting quality standards you expect. Workmanship and service you can count on. A 'can do' approach when you need a problem solved. The latest Australian interior design and fit-out trends to excite and inspire. And a local's understanding of the standards, practices and changing needs of Australian workplaces.

Strength in Partnerships

Your business means everything to us: that's because AMS's success is built on the strength of our distribution network. We treat your business like it's ours, sharing your goals to meet customer commitments, and ensuring that timelines and expectations are delivered upon. It's a true business partnership, built on trust and loyalty. That means we respect your role in cultivating and managing client relationships, knowing that we won't communicate or sell directly. As a partner, AMS is exclusively a wholesaler, offering a business model that's always complementary; never competitive.

AMS stands for:

Australian-made quality and service with local manufacturing and customer service

Responsive reliability, for fast turnaround on quotes, orders and dispatch and full communication at every step

Tailored solutions, whether you want to adapt furniture from our standard range or create a fully customised project solution

Ongoing value, from the instant payoff of our innovative, on-trend designs, to long-term sustainability from proven quality, superior service and warranty support

With AMS, you gain peace of mind from being in genuine Australian hands.

A Range for Every Customer

From the simplest floor plans through to the largest office fit-outs and refurbishments, we make it easy to fulfil customer needs and complete projects.

Our complete range of proven furniture and custom solutions is logically engineered and locally made for modern office and commercial fit-outs: desks, workstations, joinery, storage, receptions, screens, seating and tables.

Choice: Express, Extended or Custom

We offer three solution choices depending on the speed and level of customisation you need:

1. Express

When you need it fast, our Express range features standard sizes and finishes that are in stock and ready for quick delivery. Customers can arrange pick up from our warehouse in 1-2 working days, or choose delivery and floor loading to Sydney metro areas dispatch within 2-3 working days, or slightly longer for NSW regional or interstate.

2. Extended

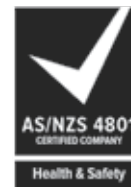

More choices in size, colour and finish, with a 2-3 week delivery time anywhere in Australia.

3. Custom

The ultimate choice. Customise the size, shape, fabric and finish of your furniture to suit the project specifications. Delivery timeframe is on application.

Strictly Certified

AMS products are certified to Australian Standards for health and safety and International Standards for environmental and quality. We also hold BIFMA certifications.

- Made to order
- 100% Australian made
- Choose from a large standard range of stocked board colours
- Custom-shaped tops available on request

Warranty: 10 years

Choose from 16 stocked board colours

AMS Furniture specialises in the contract Australian manufacture of worktops. With two dedicated factories for melamine production and one completely dedicated to worktop manufacture, we can help with any worktop requirements.

We stock 16 colours of melamine board and can make wholesale office worktops in any shape or size, to suit each project.
